

The Biker Lawyers Recommended Winter Motorcycle Storage Checklist

Print this checklist off and mark each step as complete to keep track of your winterization process.

- Oil and Filter Change
- Disconnect and store the battery or connect a trickle charger
- Clean, lube, and check the chain and sprocket
- Add fuel stabilizer to a full tank and run the engine briefly
- Cover the exhaust to prevent moisture buildup
- Inflate tires to recommended PSI
- Place bike on stands or rotate position monthly to prevent flat spots
- Choose a storage location with minimal temperature fluctuations
- Cover the bike with a breathable cover
- Store helmet and gear in a cool, dry place
